

## Transcript of FetchKids App Launch Coverage on VTV National News - Vietnam

August 10, 2019

- 0:00:00 Yes, we now continue to talk about how we can ensure safety for students.
- 0:00:04 There is an app for this, it helps us pick up and drop off students safely. And this has been used by many schools.
- 0:00:13 What makes this app special is that our parents can manage and acknowledge the time their children come and leave school to avoid the scenario when the child is not at school, yet both the teacher and the parent do not know about it.
- 0:00:27 This app works by using GPS. When the parent and the teacher pick up and drop off the child, both have to confirm right on the app.
- 0:00:35 The arrival time, bus/pickup route of the child, and the name of the person who is picking up the child/dropping off the child will be sent to the parent and the teacher.
- 0:00:41 What makes this app special is that the information is communicated in real time to both parties.
- 0:00:46 We're better informed as to where our children are. And it's easy for us to contact the homeroom teacher to let them know that we will be able to pick up the child soon. And the homeroom teacher can better prepare for the child for our arrival.
- 0:00:58 "When this app is available, I feel more at ease. Besides, I also feel like it's more convenient when I need to pick up the child earlier than scheduled."
- 0:01:06 The advantage of this app is that the parent and the school can quickly notify, to acknowledge the presence and absence of the child at school.
- 0:01:17 Not only for parents who use the school bus.
- 0:01:20 This app is also applicable for parents who come directly to school to pick up their children.

**August 10, 2019**

- 0:01:23 As soon as the parent starts driving to school the app will send a notification to the teacher.
- 0:01:28 The child will be handed over without any waiting time.
- 0:01:33 “It’s very convenient when I pick up my child, and it also helps to avoid the scenario of heavy traffic in front of the school.”
- 0:01:38 But this app is very convenient --everyday when dad comes to pick up, he’s shown in the app. And on the days that mom comes to pick up, she’s shown in the app.
- 0:01:47 As soon as this app was launched, nearly 90% of this school’s parents installed it right away.
- 0:01:51 We know there’s nothing as secure as the parent handing over the child to the teacher themselves and vice versa.
- 0:01:57 However, when a school bus is needed instead, a supervised app such as this is necessary.
- 0:02:03 It’s a way to ensure that our children safely come to and from school without being forgotten.
